Health Care Financing Administration
October 1980

HCFA-02127

The Health Care Financing Administration (HCFA) was established to combine health financing and quality assurance programs into a single agency. HCFA is responsible for the Medicare program, federal participation in the Medicaid program, the Professional Standards Review program, and a variety of other health care quality assurance programs.

The mission of the Health Care Financing Administration is to promote the timely delivery of appropriate, quality health care to its beneficiaries—approximately 47 million of the nation's aged, disabled and poor. The agency must also ensure that program beneficiaries are aware of the services for which they are eligible, that those services are accessible and of high quality, and that agency policies and actions promote efficiency and quality within the total health care delivery system.

The purpose of this listing of Selected Publications is to support a part of HCFA's mission—to keep the public informed as to the kinds of informational materials available from the Health Care Financing Administration.
